

Here's two ways many California red light cam tickets can be beat:

1. Check to see if it is a Snitch Ticket, the fake/phishing camera tickets California police send out to bluff car owners into ID'ing the actual driver. Snitch Tickets say, at the top, "Courtesy Notice-This is not a ticket," and you can ignore them! Skeptical? Google: Snitch Ticket.

2. Were you LA County? Even a REAL red light camera ticket from ANY city (or the sheriff, or the MTA) in LA County can be ignored, as the LA courts do not report ignored camera tickets to the DMV. This was revealed in LA Times articles in 2011. Skeptical? Google: Red light camera no consequence.

The average age of those receiving red light camera tickets is 47, so please pass this info along to your older friends and family.
