RE: Termination of Legacy Red-Light Camera NTS System

Dear Ms. Adewusi:

Per your 10/16/14 email (attached) to Sgt. Rod Rifredi notifying him that ATS will be terminating support of our legacy NTS system within the next few weeks, please be advised that we will not be upgrading to a newer system and no longer intend to use a red light camera system within our city at this time. Please contact Sgt. Rifredi with instructions for removal and return of the various system components.

Please be advised that the City expects ATS to continue to indemnify and defend the City in the ongoing litigation involving the stop payment notice claim filed by Matthew Jaime following the effective date of termination in accordance with the indemnification provisions under Sections 5.2 and 7 of the Lease and Services Agreement. The City will additionally continue to withhold final payment to ATS until Mr. Jaime's claim is resolved.

Thank you for your past service and support.

Sincerely,

A handwritten signature in black ink, appearing to read "Darren Pytel", is written over a horizontal line.

Darren Pytel
Assistant Police Chief

Subject: Davis Upgrade Proposal

Importance: High

Hello Rod,

Per our conversation, ATS can no longer continue the technological support required to maintain the legacy NTS system but would like to offer the City of Davis an upgrade to the current system. Because of our long standing partnership, ATS would like to upgrade the legacy NTS system to the AXISIS RLC-300 RED-LIGHT SAFETY SOLUTION. This solution will capture more events, give you better image and video quality and provide you with the video capabilities we discussed earlier in the year. The details of the AXISIS RLC-300 RED-LIGHT SAFETY SOLUTION is attached to this email.

The pricing for the AXISIS RLC-300 RED-LIGHT SAFETY SOLUTION upgrade is below:

Term	Price per Existing Camera	Total Program Cost per Month
3 Year	\$3,500	\$7,000
5 Year	\$3,000	\$6,000

*Currently the City is paying \$2500 per camera; total program cost per month is \$5000.

Support of the current legacy NTS systems will be terminated within the next few weeks, therefore we will need a response from the City by or before October 31, 2014 on how they would like to proceed.

Please don't hesitate to call or email me if you have any further questions on the above information.

Thank you,
Bose
