Subject: ATS/City of South San Francisco (PW 2011-028)

Frank,

In response to your inquiry from last week, all preventative maintenance work is performed by ATS employees. This includes cleaning the camera enclosure lens, camera, strobe, and controller enclosure and a basic inspection to ensure that everything is working properly. This is handled by ATS's field services personnel.

For any major repair project (repairs involving roadwork, knockdowns, etc), ATS's construction personnel could either perform the work or have the contractor (Republic ITS) go out to do it. The company's records indicate that no such major repair work has been done in South San Francisco (by either ATS or Republic).

Please let me know if you have further questions.

Tony
